

## Enabling every company in the world to understand cybersecurity risk

### One platform, many use cases.

SecurityScorecard is the global leader in cybersecurity ratings, helping thousands of organizations of all types and sizes gain instant visibility into their own security posture and that of their third parties. CISOs and security teams around the world turn to SecurityScorecard for help with managing cybersecurity risk, which is at the intersection of numerous internal and external threats—especially, in terms of operational, legal, compliance and reputational risk. Through our platform, our easy-to-understand security ratings, and questionnaire management solution, we enable companies to gain a true 360-degree view of risk.

## Learn how the #1 cybersecurity ratings solution can help you.

### Third-Party Risk Management

Take control of third-party risk and improve the cyberhealth of your entire vendor ecosystem. Accelerate the vendor risk assessment process by 75%, with transparency into vulnerabilities in your third-party ecosystem and with industry-leading collaborative remediation tools.

### Enterprise Cyber Risk Management

Continuously monitor your cybersecurity posture, manage your reputational risk, and address real-time issues and findings against your business. Create a data-driven narrative with metrics that shows stakeholders the current and potential business impact of security risks and the efforts to mitigate them.

### Cyber Insurance

Accurately assess the security posture of insureds and continuously monitor your portfolio. Leverage the largest network of rated companies to accelerate the time to quote, enhance cyber risk modeling, and provide value-added services to your clients.

### Executive-Level Reporting

Effectively communicate your cybersecurity strategy and risk posture to the Board and C-Suite in an easy-to-understand ratings language. Align cybersecurity with business needs, report on your organization's performance, and demonstrate the efficacy and ROI of your cybersecurity programs.

### Cyber Due Diligence

Gain insight into the cyber risk of any company, make data driven business decisions, and reduce financial risk. Perform more in-depth due diligence on an acquisition target, for a credit underwriting decision, or for a financial trade, minimizing the risk of costly cyber-related mistakes. Make prudent and risk aware financial decisions.

### Service Providers

Enhance your offering with valuable SecurityScorecard data. Whether you're a data service provider, managed service provider, or advisory service provider, leverage SecurityScorecard to provide more value to your clients.

### Compliance

Enable cybersecurity compliance, audit remediation, and attestation with evolving regulations and industry standards. Instantly map SecurityScorecard ratings to industry frameworks, track changes, and build remediation plans to remain compliant with auditors. We help organizations prove and maintain compliance with leading standards and regulations including PCI, NIST, SOX, GDPR, and many others.

*"I had a lot of visibility into the benefits SecurityScorecard provides. I knew it could help the team focus its efforts on high-risk initiatives to get a quick boost in our security risk score, and it was also a good way to direct spending internally so that we get the best ROI on that spend."*

Dave Ruedger,  
Chief Information Security Officer, RMS

### About SecurityScorecard

SecurityScorecard's helps security professionals work collaboratively to solve mission-critical, cybersecurity issues in a transparent way. The SecurityScorecard platform provides continuous, non-intrusive security monitoring of any organization and its ecosystem.

### Ratings

Continuously monitor, analyze, and report risk across 10 risk factor groups in an easy-to-understand A-F grade. SecurityScorecard uses non-intrusive and proprietary data collection methods, to quantitatively evaluate the cybersecurity posture of any organization.

### Atlas

Automate the cybersecurity questionnaire and evidence exchange process with key insights automatically mapped to SecurityScorecard data. Gain a true 360-degree view of any organization's cybersecurity posture with the leading cybersecurity questionnaire exchange and validation solution.

### Data

Access SecurityScorecard's ever growing, actionable dataset on the largest network of rated companies to inform data-driven business decisions. See top-level, factor-level, and issue-level ratings and details along with historical remediation data, the event log, compliance mappings, and industry comparisons for any company in the world.

### Professional Services

Expand your team's capabilities, gain further time-savings, and scale efficiency with experienced security professionals by your side. SecurityScorecard's professional services offer strategic and technical guidance from subject matter experts.

### API & Integrations

Leverage SecurityScorecard data and contextualize information to power your existing workflows. Leverage our robust API to build a custom integration or pre-built integrations with leading industry solutions including GRCs, ITSM, SIEM, and cyber risk modeling.
