SmartBear Product Portfolio

At SmartBear, we focus on your one priority that never changes: quality. We know delivering quality software over and over is complicated. So our tools are built to streamline your process while seamlessly working with all the tools you use – and will use. Our tools are easy to try, easy to buy, and easy to integrate. We're used by over 16 million developers, testers, and operations engineers at over 32,000 organizations. Wherever you're going, we'll help you get there.

DESIGN

SwaggerHub – Develop and document APIs on one collaborative platform using the OpenAPI Specification.

Cucumber Open – Use BDD open source software to define acceptance criteria, execute automated tests, and generate living documentation.

Pactflow – Find and fix integration errors sooner and streamline collaboration with contract testing.

REVIEW

Collaborator – Ensure quality and trust between developers with peer code and document review.

TEST

ReadyAPI – Flexible API testing platform offering a full stack of functional, security, performance, and virtualization tools that accelerate API quality.

TestEngine – Accelerate and scale the management, execution, and reporting of SoapUI API tests.

TestComplete – Run and maintain your automated testing for desktop, web, and mobile apps.

LoadNinja – Execute load tests on any web application with thousands of real browsers.

BitBar – Test mobile apps on real devices in the cloud, using any automation framework.

MANAGE

Zephyr – Track test cases, pipeline metrics, and more. Natively within Jira or standalone.
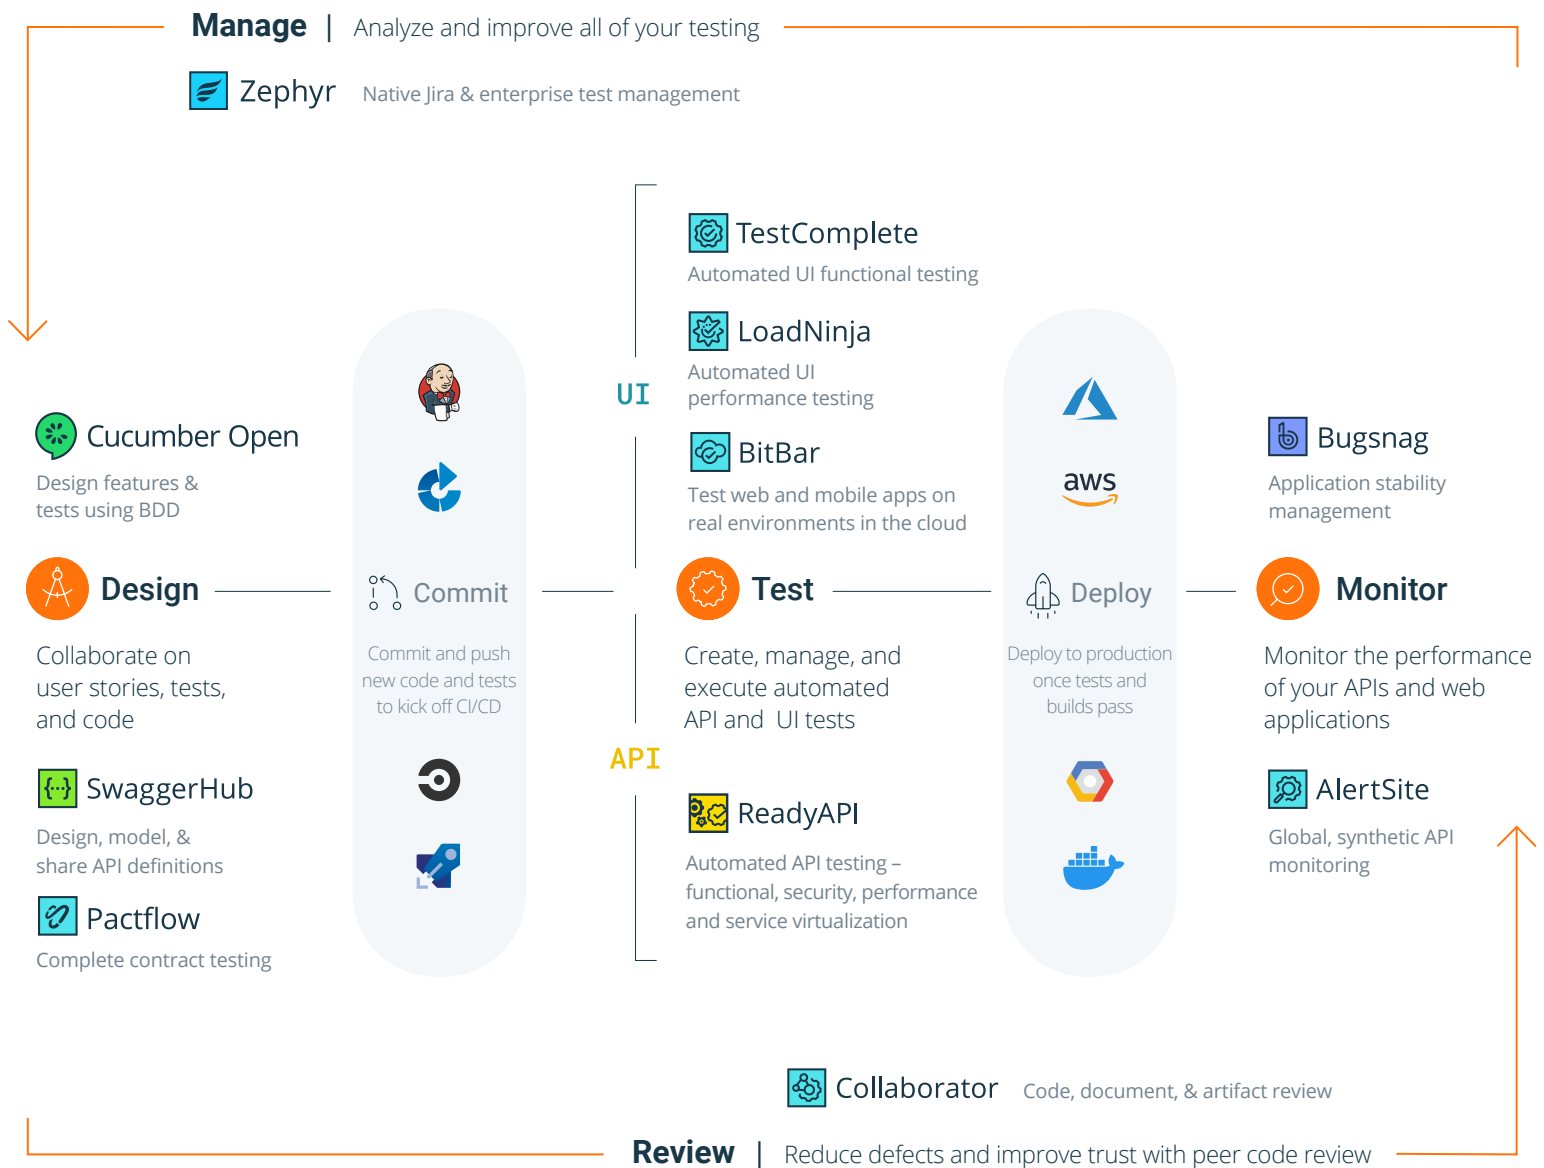

MONITOR

AlertSite – Track performance inside or outside your firewall for web, mobile, and APIs.

Bugsnag – Monitor app stability and gain actionable insights and diagnostics to address bugs impacting the user experience.

Software Development Lifecycle with SmartBear

Agile and DevOps have transformed the rate of software development. To keep up, teams must work and communicate in new ways – which is where SmartBear comes in. Our tools help streamline your process, so you can release software at the speed your customers expect.

Manage | Analyze and improve all of your testing

Zephyr   Native Jira & enterprise test management

TestComplete
Automated UI functional testing

LoadNinja
Automated UI performance testing

BitBar
Test web and mobile apps on real environments in the cloud

UI

Cucumber Open
Design features & tests using BDD

Design
Collaborate on user stories, tests, and code

SwaggerHub
Design, model, & share API definitions

Pactflow
Complete contract testing

Commit
Commit and push new code and tests to kick off CI/CD

Test
Create, manage, and execute automated API and UI tests

API

ReadyAPI
Automated API testing – functional, security, performance and service virtualization

aws

Deploy
Deploy to production once tests and builds pass

Bugsnag
Application stability management

Monitor
Monitor the performance of your APIs and web applications

AlertSite
Global, synthetic API monitoring

Collaborator   Code, document, & artifact review

Review | Reduce defects and improve trust with peer code review

SMARTBEAR

16M+ Users | **32K+** Companies | **194** Countries

Over 16 million software professionals and 32,000 companies across 194 countries use SmartBear tools.
