

## Exceptional Email Security

EmailSecurity

Block known and emerging email threats to keep your teams safe. Libraesva integrates cloud email and a secure email gateway with our unique adaptive trust engine to provide award winning protection.

Layered security defends your business against spam, malware, phishing, email fraud, spoofing, zero-day threats, account takeover, social engineering, business email compromise, inadvertent disclosure of sensitive information and more.

- ✓ Secure email gateway
- ✓ Adaptive Trust Engine powered by AI
- ✓ Gateway sandbox and active URL Protection
- ✓ API integration to Microsoft and Google

## Secure Email Archiving

EmailArchiver

Protect your business information, simplify compliance, and improve efficiency by using Libraesva Email Archiver to automatically save a copy of every email sent or received by your business.

Resilient Archive technology stores every email in highly secure, digitally signed archives built for blazing fast search and e-discovery. Comply with industry regulations and data protection legislation including GDPR, CCPA, SOX and HIPAA, ensuring email communications are kept unaltered for as long as required with customizable retention rules.

- ✓ Digitally Signed, Tamper-Proof Archives
- ✓ Fast, Powerful Search
- ✓ Native Connectors to Microsoft, Google and more
- ✓ Distributed Storage for High Availability

## Complete DMARC Protection

Effortlessly take control of your email reputation and secure the delivery of your messages with DMARC. Prevent criminals from impersonating your domains and sending fraudulent emails to your business partners, employees, and customers.

LetsDMARC prevents domain spoofing by authenticating legitimate senders, and blocking emails that spoof your "from" address to reduce fraud and improve your brand reputation with ISPs. Simply manage DMARC, DKIM and SPF settings through an intuitive portal, with at-a-glance view of message flow, including pass, quarantine and reject rates.

- ✓ **Guided DMARC, DKIM and SPF configuration**
- ✓ **Intuitive dashboard insights**
- ✓ **Active DNS monitoring**
- ✓ **SPF flattening**

## Effective Phishing Simulator

Continuously test and strengthen your team's defenses against email, SMS, and online social engineering scams. Train your team to recognize threats from phishing, whaling, smishing, spear phishing, and more.

Create realistic phishing campaigns in less than 10 minutes, using email, landing page and SMS templates based on the latest phishing attacks. Modify dangerous behaviors, and foster a security-conscious culture by delivering impactful in-moment training precisely when employees become hooked.

- ✓ **Customizable Templates**
- ✓ **Security Awareness Monitoring**
- ✓ **Impactful In-Moment Training**
