THREATDOWN ELITE

When "Good Enough" is NOT Enough

ORGANIZATIONS NEED BETTER PROTECTION IN A SINGLE, EASY-TO-USE PACKAGE THAT WON'T BREAK THE BANK

Cyberattacks aren't slowing down. In 2022, ~85% of organizations experienced at least one successful cyberattack, ~40% experienced six or more, and nearly three-quarters (~70%) expect to get hit during the coming year.[1]

CHALLENGES

✓ **Too many attacks are successful:** 70% of organizations bore the brunt of ransomware last year[2]

✓ **Threat actors linger too long:** 277 days on average to identify and contain a breach[3]

✓ **Multiple point solutions increase cost and complexity:** 55 cybersecurity tools on average that organizations have deployed[4]

✓ **IT/security teams are understaffed:** 62% of organizations lack sufficient cybersecurity staff[5]

THREATDOWN ELITE – BENEFITS

Purpose-built for resource-constrained organizations, **Elite** delivers comprehensive protection in a single solution that offers unparalleled ease of use at a price that makes sense.

Improve security

- **24x7x365 endpoint monitoring and response** by our team of cybersecurity experts with 150 years of collective experience in threat hunting, forensic analysis, and incident response
- **Attack detection** through award-winning technology with suspicious activity monitoring, freeform threat hunting, and Ransomware Rollback
- **Accelerated response** through patent-pending technology that continually scans alerts, escalating only the most critical, to which our team can respond on your behalf
- **Threat prevention** with multi-vector protection that won't slow your devices
- **Attack surface reduction** via vulnerability scanning and automated patching
- **Application blocking** to prevent unauthorized programs from executing on endpoints
- **Security that only gets better with age** because, based on lessons learned, our team of experts refine security techniques for faster, more precise detections and alerts over time

Reduce complexity

- **Centralized management** via cloud-based console with user-friendly interface that eliminates the need to learn multiple consoles—even when adding security capabilities
- **Single lightweight agent** that deploys in minutes and works across all ThreatDown products
- **Device visibility** with color-coded cues for at-a-glance security status

- **Auto remediation** via proprietary Linking Engine that finds and automatically removes most malware executables and associated artifacts, changes, and process alterations
- **Security Operations Center (SOC) in a box** with our technologies managed by our experts to augment your team's efforts

Maximize value

- **Fastest implementation** validated by the G2 Fall 2023 Implementation Index, which shows that our suite has the shortest go-live time of all competitive solutions
- **Easiest to manage** validated by the G2 Fall 2023 Usability Index, which awarded our suite "Easiest to use" for its ease of administration and use
- **Best ROI** validated by the G2 Fall 2023 Results Index, which awarded our suite "Best estimated ROI" of all competitive solutions
- **Best value** for one bundle, one agent, one console, one SOC, and one trusted partner

THREATDOWN ELITE – FEATURES

- **Managed Detection and Response:** 24x7x365 monitoring by our experts, who analyze, respond to, and remediate threats on your behalf (even those that escape technological detection)
- **Endpoint Detection and Response:** Award-winning solution that provides continual active detection and response, suspicious activity monitoring, integrated cloud sandbox, and Ransomware Rollback
- **Managed Threat Hunting:** Automated alert scanning that correlates EDR data against external and internal threat intelligence feeds, prioritizing threats and escalating the most critical with clear, step-by-step, response guidance
- **Endpoint Protection:** Defense-in-depth prevention that stops signature-based, fileless, and zero-day attacks before they infiltrate your system
- **Vulnerability Assessment:** Run scans on demand or on schedule to search for operating system and application vulnerabilities
- **Patch Management:** Automate the patching process to lock up potential access points
- **Application Block:** Easily block unauthorized programs to enforce acceptable-use policies
- **Incident Response:** Built on our proprietary Linking Engine that not only removes malware executables but finds and automatically eradicates all associated files and changes to prevent re-infection
- **31-day lookbacks** by our team of experts, who search for Indicators of Compromise to stop attacks and refine detections and alerts going forward

Complete protection delivered in a single package at a price that makes sense. Call today to get started.
