

Comprehensive AI Writing Assistance for the Entire Institution

Grammarly for Education is the trusted AI writing partner built for the needs of the educational institution. Our communication assistance is fine-tuned to help everyone at your institution **brainstorm, draft, revise, and submit** their most compelling and authentic work. By providing best-in-class real-time suggestions within the context of the writing task, students, faculty, and staff can communicate clearly in the writing tools they're already using.

→ **Improve student outcomes**

Help students master the basics of clear writing while giving them the experience of responsibly using AI. Grammarly makes it easy for students to level up their writing, with suggestions on clarity, tone, argumentation, and engagement.

→ **Suggestions that fit the context**

Whether it's writing a fundraising email as an administrator, sending an all-staff communication as a dean, or crafting a first-year writing assignment as a student, Grammarly has it covered. Our custom AI model understands your audience and goals, using them to provide strategic suggestions that help you communicate clearly.

→ **The right AI model for every task**

Most AI writing assistants are limited to one AI model. Grammarly uses multiple models, including our proprietary ones. Everyone at your institution gets seamless access to the best output, whether it's students writing papers or staff drafting emails.

→ **Works everywhere you do**

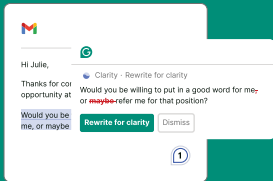

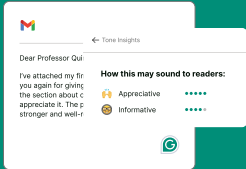

Grammarly seamlessly integrates into your institution's tech stack with one-day implementation and minimal training. Students, teachers, and staff can use AI-powered communication assistance in over 500K apps with a consistent experience.

94% of students say Grammarly Pro helped improve their grades.

Features That Improve Faculty, Staff, and Student Workflows

- **Always-on writing support**
Provide in-line suggestions that improve writing for students, faculty, and staff. Grammarly helps improve students' writing quality over time, enabling professors to focus on evaluating content over grammar.
- **Style guides and brand tones**
Empower every employee to create consistent, on-brand communication with responsive style guides and real-time brand voice guidance.
- **Citation generation**
Students can quickly generate accurately formatted APA, MLA, and Chicago style citations straight from the web browser. Grammarly also helps students cite where generative AI was used.
- **Plagiarism and AI detection**
Grammarly scans students' writing against databases and billions of web pages to flag passages that need citation before they submit. It now features a custom AI detection model trained on hundreds of thousands of human and AI-generated passages.
- **Authentic, original writing**
Teach students how to use AI responsibly to create their most authentic work with responsible use reminders and Authorship features that automatically categorize sources of text and demonstrate how a piece of writing was created. (Authorship available as a Beta in fall 2024).
- **Institutional controls**
Manage who has access to Grammarly with intuitive controls that turn features on/off by user group.
- **Optional AI features**
Speed up every step of the writing process, from blank page ideation to editing, with generative AI and prompt-free, proactive writing suggestions that deliver highly contextual, relevant, and on-brand generated content.

AI Built Responsibly

Grammarly provides enterprise-grade security and AI built with fairness and safety in mind. End-user and institutional data and text are never sold or used to train models. Institutional customers can provide their own encryption keys and choose how long users can stay logged in before needing to reauthenticate. All data is anonymized and processed with no user data stored for security.

Trusted by over 3,000 educational institutions

"Grammarly is easy to install and available in all products and applications where students and faculty write, eliminating the need to switch back and forth."

Craig Stanley

Director of Strategic Initiatives and Special Projects
at Florida State University

"Grammarly is a top-notch tool for grammar and writing. With AI-powered features, it caters to the needs of students and instructors, enhancing their writing process. Everyone should consider it."

Dan Alig

CIO at The Wharton School, University of Pennsylvania
