

Secure, Responsible AI Communication Assistance for the Educational Institution

Grammarly for Education empowers faculty, students, and staff to become clear, concise communicators. Our AI-powered writing assistance gives you everything you need to embrace innovation responsibly while keeping your data secure.

→ Best-in-class privacy controls

You remain the owner of your content. Grammarly has no ownership rights to any text written using our service. We only process data that is necessary to provide our service.

→ Commitment to responsible AI

We keep humans in the loop, with a responsible AI team dedicated to designing and implementing features that reduce bias, misinformation, hate speech, and other harmful content from unintentionally surfacing in Grammarly's generative AI output.

→ Institutional controls that enhance security

Our administrative tools make it easy to add, remove, or transfer accounts, set up SSO, and turn specific institutional features on-off by user group.

Works Where You Work

Deliver a consistent communication experience across your entire ecosystem. Grammarly works with over 500,000 web and desktop apps, making conversations more valuable wherever you write.

Trusted by 3,000 Institutions

Safeguard Your Organization's Data

→ Product improvement and training control

No user content is used to train our models or improve our product for other users, and we also make sure that our third-party partners do not store your content or use it to train their models.

→ Bring your own key

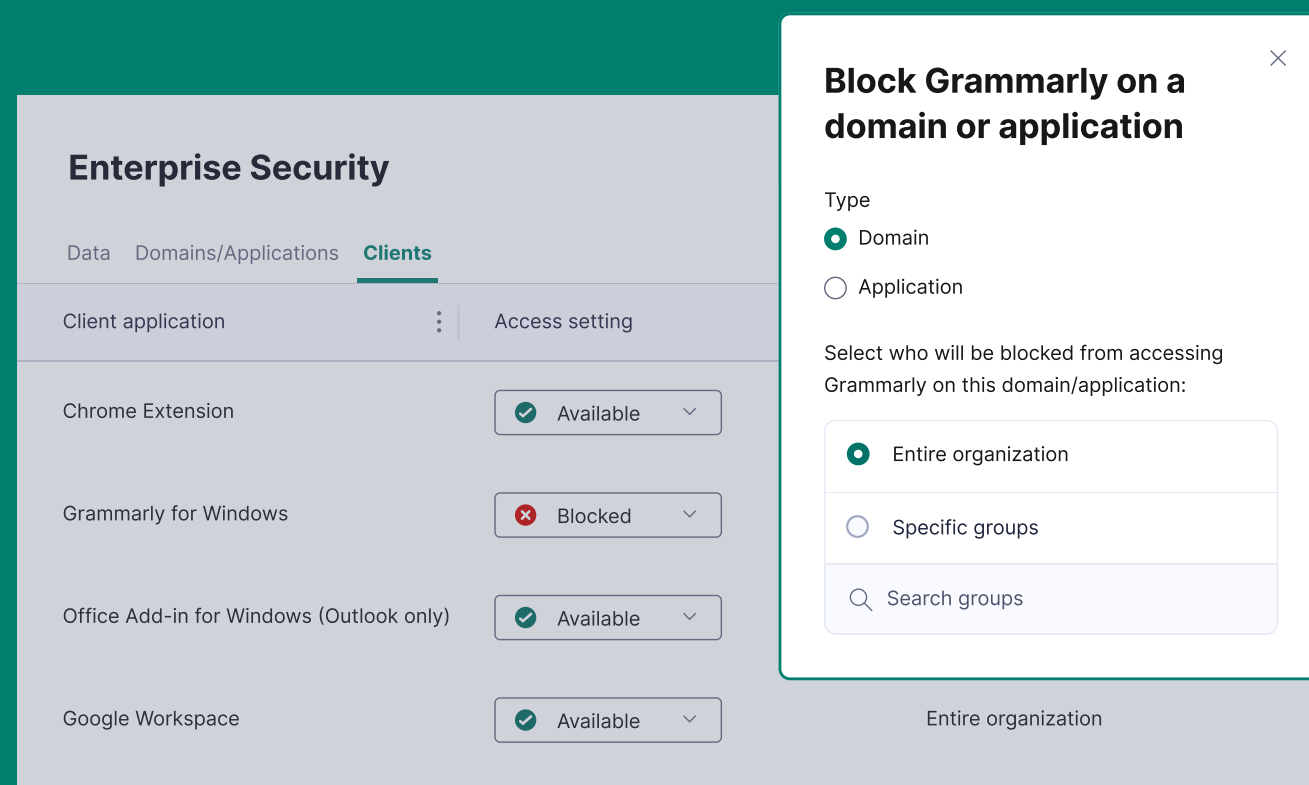

On top of our built-in security controls and data encryption, you can generate your own security keys via Amazon Web Services Key Management (AWS KMS) to encrypt your organizational data at rest and access detailed logs via AWS CloudTrail.

→ Group-level security controls

Customize Grammarly access at a granular level. Configure domain and application blocklists for specific groups according to your organization's needs.

→ Session timeout

Safeguard accounts against unauthorized entry and understand your active users by setting sessions to expire after a time period that's defined by you.

Effortless, Secure Enterprise-Wide Deployment

Centralized Administration

Easily manage your subscription, users, and data and security features, and monitor usage for your entire institution all from the admin hub.

Flexible Governance and Control

Tailor Grammarly to fit your institution's policies and needs with customizable access and management permissions. Balance security and usability by configuring where Grammarly works in your institution.

Confidently Scale

Deploy and manage Grammarly with SSO, SCIM provisioning, account capture, and more. Optimize license utilization with visibility into cost centers and usage data.

Enterprise-Grade Security

Grammarly gives educational institutions complete control and transparency over data usage. Our products are backed by the highest certification and regulatory compliance standards, including GDPR, FERPA, SOC 2, and more.
